

My name is Gonzalo Enei. I'm a founder and a product maker.

I co-founded 🌈 Faces, a presentations platform where every slide is a software artifact. I was the CEO for 3 years. My co-founders run it today. We built several other 🎨 AI-native products, including a 🗑️ Workspace where every tool was usable by humans and agents, and an extension that generated 📄 Interfaces using the underlying webpage as a backend. Hi Ventures and Bessemer backed us.

Before that, I was employee No.11 at 💡 Fintual, which makes investing easy for people in LatAm. I was Head of Growth and later VP of Product, as we grew from \$10M to \$650M in assets under management in four years. This was Sequoia's first investment in Chilean founders, founders who in turn invested in Faces.

I also started a positive media company that was viewed by millions monthly, co-authored some behavioral research, and studied humanities, law and entrepreneurship at PUC, LatAm's top university.

Grew up in Tokyo and Santiago. Now in the Bay Area. I hold a green card as an alien of extraordinary ability.
